INTERMODAL TRANSPORT

On the market since

1992

Agromex in Numbers

- 30+** Years of experience
- 160+** Employees
- 360+** Owned vehicles
- 12 000** Transports in 2023

AGROMEX was founded in 1992 and over more than 30 years of operation, remaining a family business, has become one of the largest transport companies in Poland. We offer road and intermodal transport using stand-by trailers. Growing sustainably, we use zero-emission fuel (bio-LNG) to power our vehicles. Our experienced team of dispatchers is always ready to assist you.

NEW INTERMODAL CONNECTION

KARSZNICE - ROTTERDAM
EMISSION REDUCTION ON THE
RAIL SEGMENT BY OVER

82%

The multimodal terminal in Zduńska Wola – Karsznice marks a breakthrough in the Polish transport sector. The port, handling traffic on an impressive scale - up to 500,000 containers annually and around a thousand containers daily - significantly increases the logistics potential in central Poland.

Together with PKP Cargo in Zduńska Wola, we have opened a new chapter in sustainable inter-modal transport, offering modern freight transport options on routes between Poland, the Netherlands, and England.

BIO LNG

Why?

At AGROMEX, we use ecological fuels of the future. BIO LNG reduces CO2 emissions and air pollution. Its use supports the sustainable development of our company and contributes to environmental protection. Bio LNG is also efficient and economical, making it an attractive choice for companies looking to reduce transport costs and carbon footprint.

AGROMEX FLEET

BIO LNG Trucks

Our company's fleet consists of trucks powered by LNG and bio-LNG. With a single refueling, they can cover up to 1600 km. By using alternative energy sources, we significantly reduce the carbon footprint of our transport activities.

Intermodal Train

The intermodal train integrates sea containers and trailers, connecting them with rail and water transport. This is an efficient way to transport various goods in an ecological manner.

Intermodal Trailers

Our fleet is complemented by MEGA curtain-side huckepack trailers. These are trailers adapted for transport by rail and Ro-Ro ships.

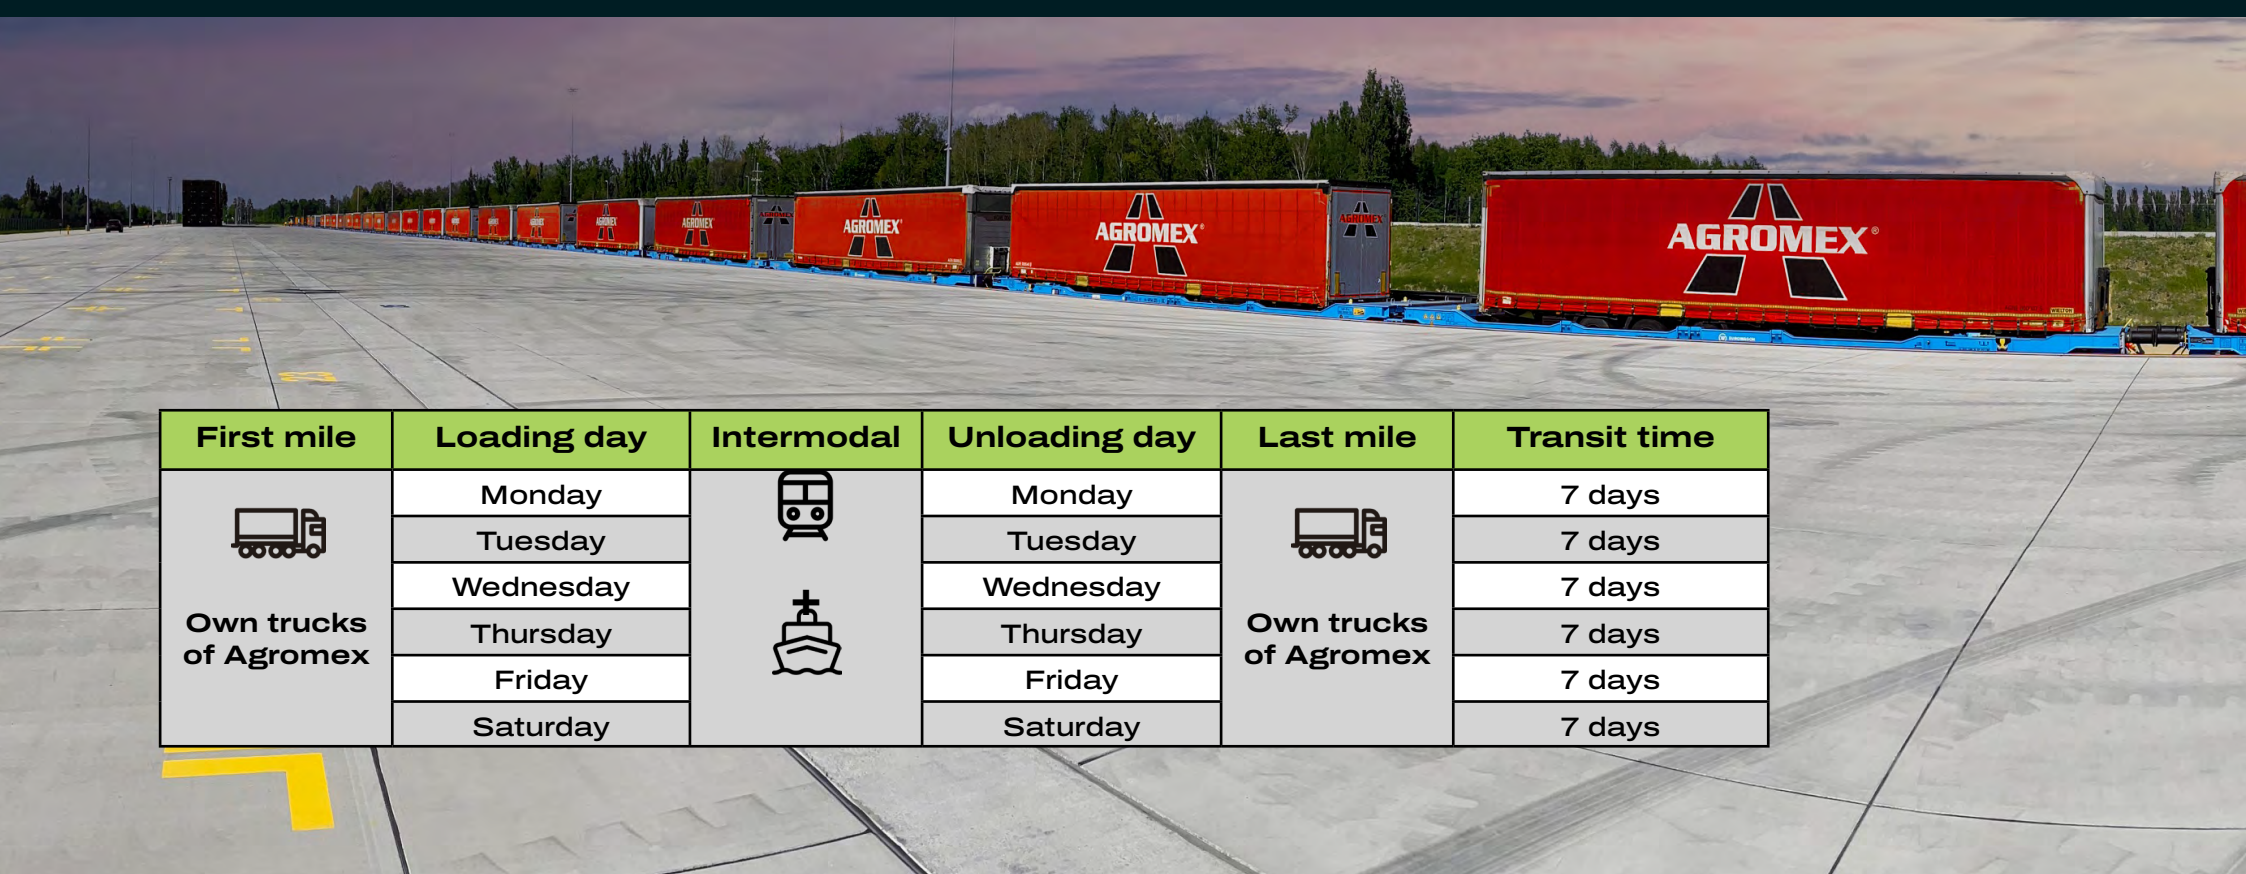

TOWARDS SUSTAINABLE DEVELOPMENT

 $1 \times \text{Train} = 40 \times \text{Truck}$

 Emission reduction
 CO_2e by over 47%

(door-to-door, over long distances)

Our company is distinguished by its mission to reduce the negative impact on the environment and surroundings through the introduction of innovative solutions. We strive to be a pioneer in creating systems for a better future.

First mile	Loading day	Intermodal	Unloading day	Last mile	Transit time
 Own trucks of Agromex	Monday		Monday	 Own trucks of Agromex	7 days
	Tuesday		Tuesday		7 days
	Wednesday		Wednesday		7 days
	Thursday		Thursday		7 days
	Friday		Friday		7 days
	Saturday		Saturday		7 days

Timetables and Transit Time

The timetable and transit time are key elements of our operational efficiency. Through precise route planning and optimization of transport schedules, we can provide our customers with not only on-time deliveries but also flexibility and quick response to changing market conditions. Our team of specialists constantly monitors and adjusts timetables, ensuring efficiency and customer satisfaction, which allows us to maintain the high quality of our services.

Westbound service	Train Karsznice - Rotterdam		Ferry Rotterdam - UK	
	Departure Karsznice	Arrival Rotterdam	Arrival Felixstowe	Arrival Immingham
A	Wednesday 18:00	Friday 01:00	Saturday 03:45	Saturday 08:30
B	Sunday 12:00	Monday 19:00	Tuesday 18:00	Wednesday 08:30

Eastbound service	Ferry UK - Rotterdam		Train Rotterdam - Karsznice	
	Departure Immingham	Departure Felixstowe	Departure Rotterdam	Arrival Karsznice
A	Wednesday 19:30	Thursday 02:30	Friday 10:00	Saturday 17:00
B	Saturday 18:00	Saturday 21:00	Tuesday 03:00	Wednesday 10:00

Plans for the near future include expanding the service with two additional train loops.

OWN VEHICLES FIRST AND LAST MILE

Our own vehicles are a key element of our transport strategy, especially in areas related to the first and last mile of deliveries. Thanks to them, we can ensure flexibility, speed, and comprehensive customer service, which is extremely important in today's dynamic business environment. By implementing innovative solutions in the field of ecological vehicles and route optimization, we aim not only to increase the efficiency of our operations but also to minimize the negative impact on the environment.

We cooperate with Wielton

Thanks to their technologically advanced solutions in trailer production, we can ensure the high quality and reliability of our vehicle fleet. These partnerships with companies of such experience and reputation allow us not only to maintain but also to raise the standards of our transport services, contributing to the effective and sustainable development of our business.

CONTACT

We encourage you to contact our experts directly. Our team will provide you with the best support and advice in choosing the right services for your business.
